Please do the proper thing and reject the NAB's petition 04-160 and support the satellite radio companies right to give their listeners local content such as news, traffic and weather etc. Cable Television and Satellite Television provide local content to their viewers. Is this not the same situation? I like being able to be traveling and hearing enroute to home the local weather and or traffic and news here. My city is not yet covered by the traffic and weather by satellite Radio, but I look forward to the content soon. Recently I went to the Washington D.C. area and the weather and driving news was indispensable. Had I not been a satellite subscriber, I may have never found the info via the broadcast stations.

Respectfully yours,  
Mike
